Discrete Mathematics
Volume 205, Numbers 1–3, 28 July 1999

Contents

Contributions

A. Bonnecaze, P. Gaborit, M. Harada, M. Kitazume and P. Solé
Niemeier lattices and Type II codes over $\mathbb{Z}_4$ 1

G.J. Chang, L. Huang and X. Zhu
Circular chromatic numbers of Mycielski's graphs 23

K.H. Chew
Total chromatic number of graphs of odd order and high degree 39

Z.D. Dai, S.W. Golomb and G. Gong
Generating all linear orthomorphisms without repetition 47

Y. Edel and J. Bierbrauer
Some codes related to *BCH*-codes of low dimension 57

E. Flandrin, F. Tian, B. Wei and L. Zhang
Some properties of 3-domination-critical graphs 65

K. Fritzsche and F.B. Holt
More polytopes meeting the conjectured Hirsch bound 77

M. Grannell, T.S. Griggs and K.A.S. Quinn
Mendelsohn directed triple systems 85

V. Guruswami
Enumerative aspects of certain subclasses of perfect graphs 97

G.-N. Han and J. Zeng
q-Polynômes de Gandhi et statistique de Denert 119

A. Kyriakoussis and M.G. Vamvakari
Asymptotic normality of the coefficients of polynomials related to the classical system orthogonal ones 145

A.P. Pynko
Implicational classes of De Morgan lattices 171

H. Wang
On the maximum number of independent cycles in a graph 183

I.M. Wanless
Maximising the permanent and complementary permanent of (0,1)-matrices with constant line sum 191

Notes

M. Aigner
A Characterization of the bell numbers 207

Notes

M. Aigner
A Characterization of the bell numbers 207

M. Blidia, P. Duchet, H. Jacob, F. Maffray and H. Meyniel
Some operations preserving the existence of kernels 211

H. Enomoto, M.D. Plummer and A. Saito
Neighborhood unions and factor critical graphs 217

A. Flammenkamp
Integers with a small number of minimal addition chains 221

V. Gasharov
On Stanley's chromatic symmetric function and clawfree graphs 229

P. Hersh
On exact *n*-step domination 235

M.D. Hirschhorn
Basis partitions and Rogers–Ramanujan partitions 241

T.A. McKee
A new characterization of strongly chordal graphs 245
